

Email Spam Classifier

Presented By
Noman Siddique
Asjid Tahir

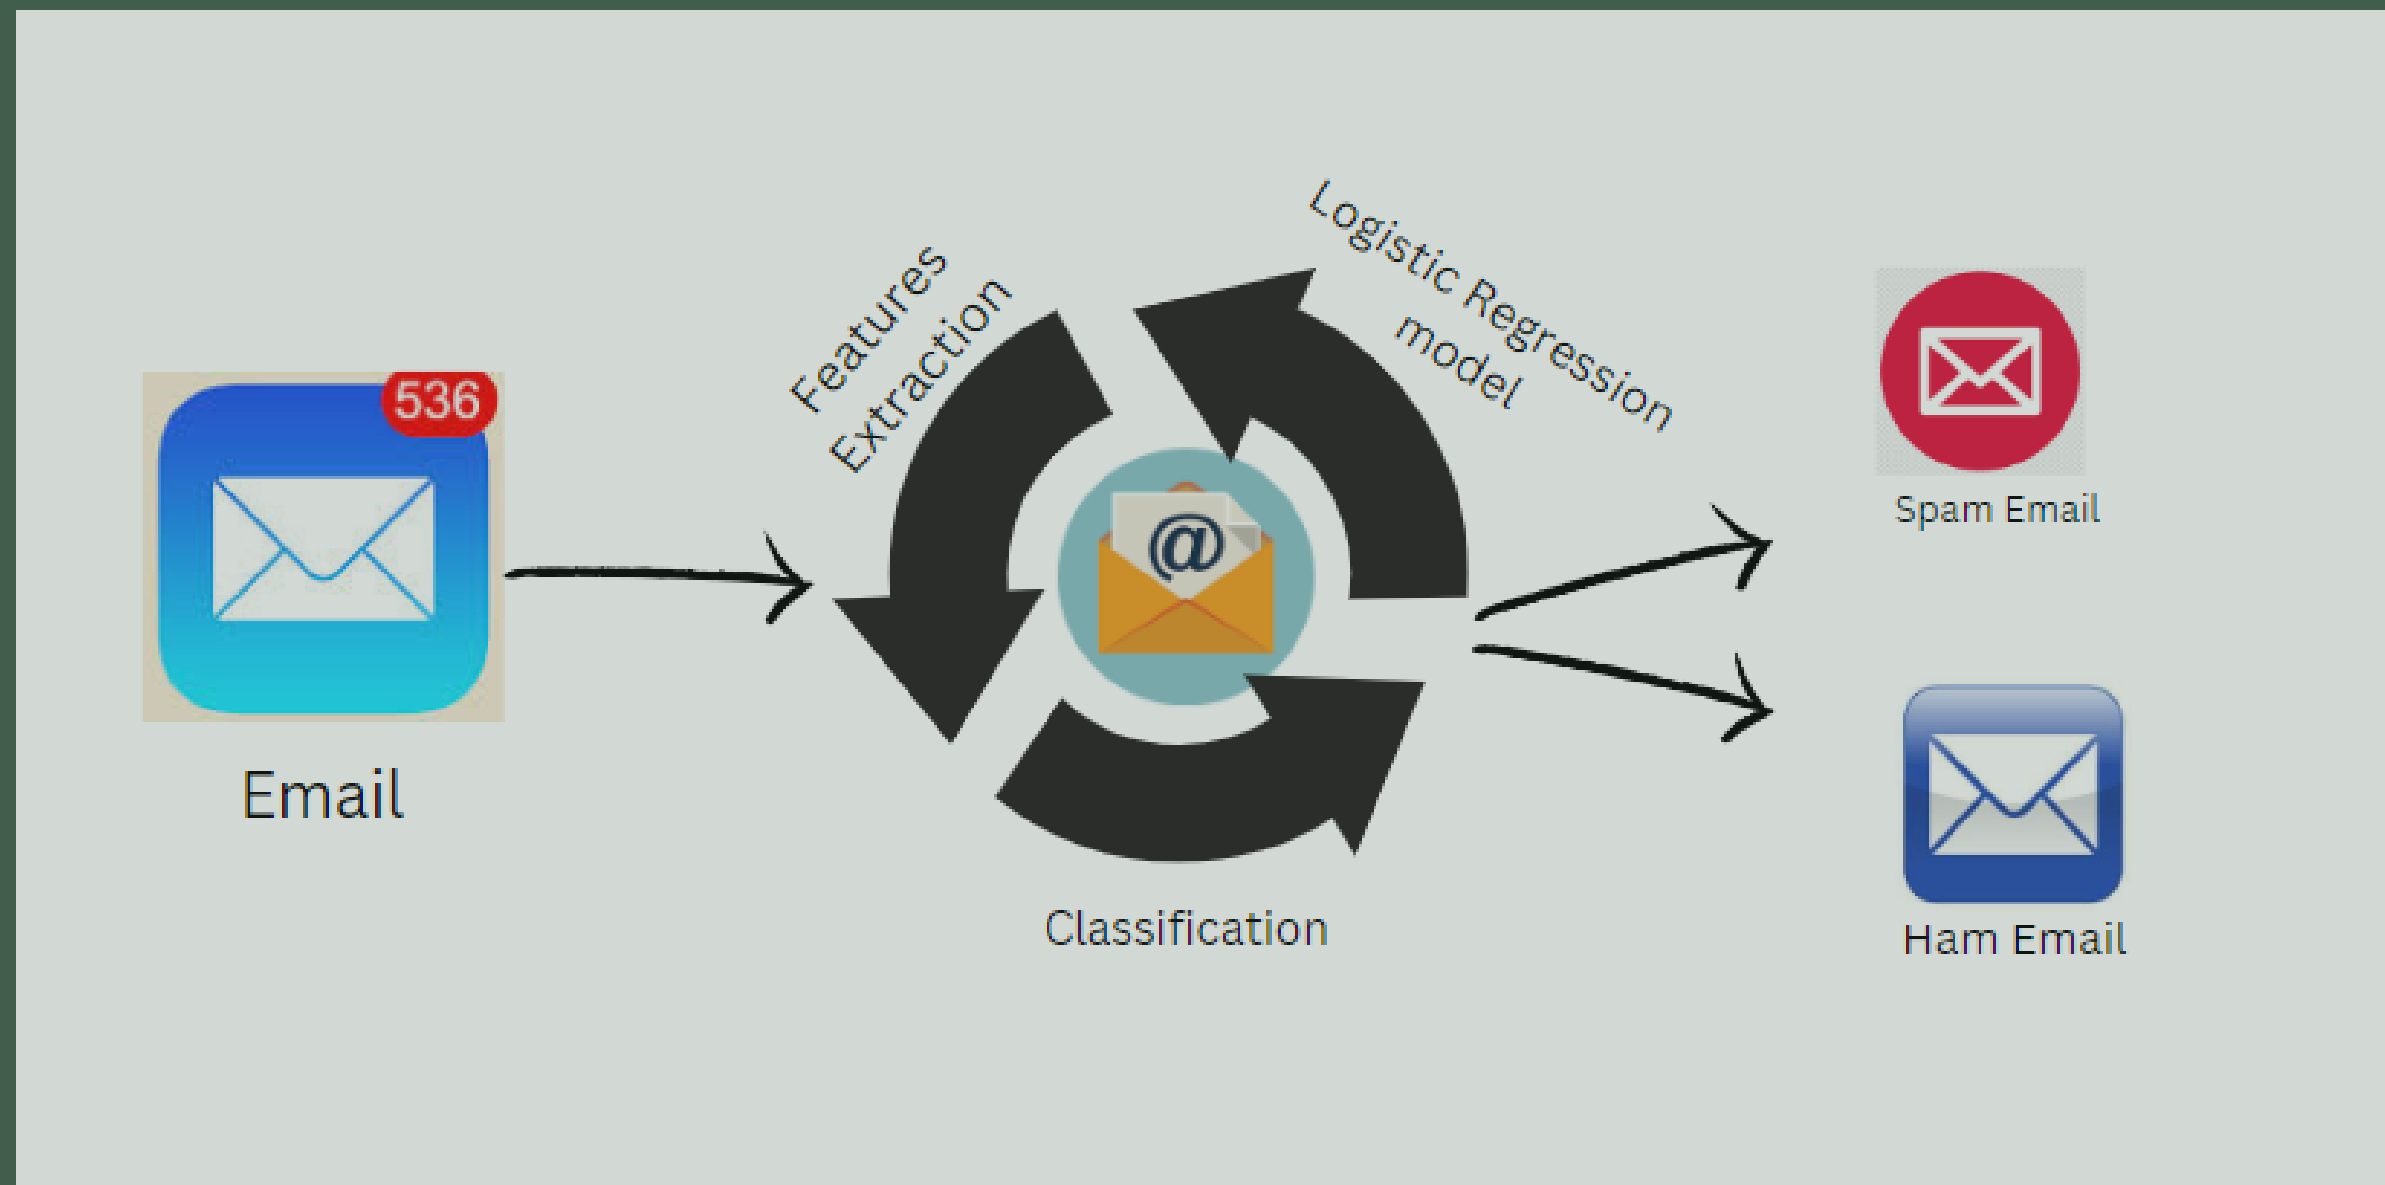

Introduction

- Our project aims to develop a system that would predict the email as Spam or not to users
- The aim of this project is to improve email security and reduce the impact of spam emails.

Problem Statement

- The problem addressed by this project is the prevalence of email spam and its negative impact on individuals and organizations.
- With the vast amount of spam emails being sent daily, it can be difficult to efficiently and effectively sort through legitimate emails and those that may contain malicious content

Flow Chart
